Selective Ontology Viewer

8th Intl. Protégé Conference - July 18-21, 2005 - Madrid, Spain

Krishnakumar Pooloth & Swaminathan Natarajan

Agenda

- Context
- Selective Ontology Viewer
- Features
- Demo

Context

Need for quick visualization of parts of ontology – Task Specific Ontology Perspectives

Selective Ontology Viewer

- Lets users easily view subsections of ontology quickly.
- Works based on persisted, pre-defined ontology template
- Built using open source graph library JGraph

Features

- Define and persist templates
- Map icons to classes
- Support for layout, easy scrolling
- Report Generation

Demo

Thank You
