

10th International Protégé Conference July 15 – 18, 2007; Budapest, Hungary

The conference is a forum for users to meet one another, to meet the Protégé team, and for us to meet you. We discuss common problems, solutions, current activities, and plans.

The conference provides a great opportunity to appreciate the breadth of applications of the technology, to share new developments in the field, and to find out how to leverage these developments in practice.

The first day of the conference will consist of tutorials and small focused workshops. The conference program will include presentations, a poster session, and a demo session.

FEEDBACK FROM PREVIOUS YEARS' PARTICIPANTS:

“This was my first Protégé Conference, but it won't be my last”

“This is perhaps the most beneficial conference I've attended”

“An excellent conference. I'm looking forward to the next one”

“It covers everyone's needs from novice to experts”

“An excellent, informative conference”

“I was able to glean nuggets each day”

“It was fun!”
