

Challenges of Developing and Deploying Large-Scale Biomedical Terminologies

Ronald Cornet PhD
Dept. of Medical Informatics
Academic Medical Center – University of Amsterdam

Academic Medical Center
Universiteit van Amsterdam

Outline of this morning

- ◆ First Session (9:00 - 10:30)
 - 10' - Introduction (Ronald Cornet)
 - 30' - Vision, requirements, and plan for ICD11 (Bedirhan Üstün)
 - 30' - SAGE project use of terminologies in guideline-based decision support (Samson Tu)
 - 20' – Discussion
- ◆ Second Session (11:00 - 12:30)
 - 30' - Auditing large-scale medical terminologies, with a focus on SNOMED CT (Ronald Cornet)
 - 45' - NCI Thesaurus (Sherri de Coronado)
 - 15' - Discussion

Challenges re. Large-Scale Biomedical Terminologies

- ◆ Developing
 - Position & Focus
 - Quality assurance
- ◆ Deploying
 - Integration
 - Services

Position & Focus

- ◆ How to draw the boundaries of terminological systems?
 - What content should and should not be included?
- ◆ What is the usage of the system?
- ◆ E.g., SNOMED is NOT ICD(9/10/11) and will NOT replace it!

Quality Assurance

Increase the size of your ontology

- ◆ How to ensure quality over quantity?
- ◆ How to validate terminological system?
- ◆ Which metrics are useful?
- ◆ How to reduce manual effort and increase automation?

Integration

- ◆ Integration of data and knowledge
 - Large terminological systems
 - Large data stores
 - Interaction between data model and terminology model
- ◆ Integration of various types of knowledge
 - Ontological knowledge, guidelines, classification rules
- ◆ Integration of various terminological systems
 - How to adequately map terminological system

Services

- ◆ Terminological systems require terminological services!

Outline of this morning

- ◆ First Session (9:00 - 10:30)
 - 10' – Introduction Ronald Cornet
 - 30' - Vision, requirements, and plan for ICD11 Bedirhan Üstün
 - 30' - SAGE project use of terminologies in guideline-based decision support Samson Tu
 - 20' – Discussion
- ◆ Second Session (11:00 - 12:30)
 - 30' - Auditing large-scale medical terminologies, with a focus on SNOMED CT Ronald Cornet
 - 45' - NCI Thesaurus Sherri de Coronado, Gilberto Fragoso
 - 15' - Discussion
